What aspects of this course should remain the same?

1. I love the organization of the course so it should remain the same. The number of projects, exams, and quizzes didn't make it seem too overwhelming which was great!
2. Content was straight-forward, and concepts could be easily learned out of class as well since there are many guides on introduction to java/programming.
3. Asking the students where their level of programming is.
4. Instructor.
5. Amazing class. I love the projects and in class exercises. Great professor.
6. Assignments and workload were manageable and not overwhelming. The breaks in the middle of lecture were very beneficial.
7. This course was taught perfectly, the professor wanted each student to do well and was very active in helping students be successful.
8. Amazing professor, great class, he did his best to ensure everyone was successful.
9. Basic intro to JAVA course taught me the basics of the language in a calm and controlled way. Professor was a great guy and made a genuine effort to see all his students succeed. He was always open for questions and was nothing but helpful.

10. The aspects of this course that should remain the same are the way lectures are taught. The lecture slides are really effective and teach the material well. Also, the quizzes and test reviews help you learn the material well.
11. The professor should stay the same. I truly enjoyed interacting and learning the material from this professor. Very knowledgeable and understanding. He was always available to answer questions outside of class as well.
12. Surprisingly, the class was very easy to follow despite learning a brand new subject. Awesome professor. He outlined everything and made sure all students were following along and took everything step by step.
13. The professor
14. The lecture notes are okay
15. Way of teaching

What aspects of this course need improvement?

1. Though Professor Tunc did get feedback after the midterm exams and followed through the suggestions, I would say to have students do the practice quizzes and practice exams at home and then it can be reviewed during class time on review day.
2. There should be more grades on the hands-on exercises than multiple-choice exams.
3. N/a
4. None
5. All powerpoint lectures were difficult to maintain focus on. The breaks helped but I also think there could be more exercises done as a class or altogether and then on our own that would've been helpful. More practice problems in the format of the tests and quizzes would've also been helpful.
6. Teach the material in sections. Not a beginner friendly class.
7. The test questions were 90 percent tracing code, which I feel is really unnecessary. The test questions were extremely unrealistic and tested patience more than actual knowledge in the language.
8. The aspects of this course that need improvement are nothing. This course is great :)
9. Nothing comes to mind. This was a pleasant experience.
10. So far, everything is good so long as you put in effort to study
11. More practice

Additional comments:

1. The professor made sure that he was able to help everyone understand the topics clearly. He definitely did a great job in teaching. He made sure that he was meeting student expectations. I would definitely take him again if I were given the chance.
2. N/a, thanks professor
3. This class is perfect.
4. All is good to me.
